Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Winquest (6,478,277) in view of Bugs 'R' Done (<http://www.safeinsecticide.com>).

Winquest shows an ant-resistant food container 10, having a food surface support 23 with a lower surface 18 that rests evenly on a flat surface and the food surface support 23 rising therefrom; a surrounding ant barrier 25 in a recess 24 encircling the food surface support 23 such that any insect climbing the support 23 must walk across the ant barrier 28 which is composed of a repellent material such as a sticky substance, col. 3, lines 41-43. The food surface is a bowl 15 having a circular rim 12 wherein the ant barrier 28 is in the circumferential recess around the bowl and resting on a pedestal 23 or 51 such that the bowl 15 is detachable for washing. Bowl 15 is considered to be a "tray" having a raised rim 12, a flat surface 15 and a food support surface 20 under the surface 15 of the bowl/tray. Winquest does not disclose the use of an off-the-shelf organic repellent. Bugs 'R' Done is an example of an off-the-shelf organic insect repellent. With respect to claim 4, to use the organic repellent of Bugs 'R' Done with the food container Winquest would have been obvious to one skilled in the art in order to make the bowl safer to feeding pets by using a less toxic repellent.

Response to Arguments

Applicant's arguments with respect to claims 4-6 have been considered but are moot in view of the new ground(s) of rejection.

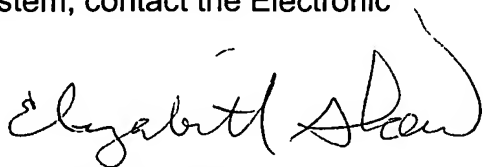

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Included for further reference is: Qunitero (6,277,144) and The Antser (<http://theantser.com>).
